Altered Beast

It is the time of gods and myths and legends. When men were warriors and courageously fought unnatural enemies in the endless battle of good against evil. It is the time of the Altered Beast.

Summoned by Zeus, God of Thunder, you have been awakened from the dead to challenge the wicked Neff, God of the Underworld, for the fate of Athena. And Athena is no ordinary girl. She is the daughter of Zeus and must take her rightful place among the gods if only you can free her from place of imprisonment.

Although you were once a brave and awesome Roman Centurion, the rigors of this journey demand a supernatural display of strength. And so you are bestowed with the powers of the Altered Beast. The power to transform your being into a part animal, part human creature of formidable force.

But to achieve this rare form of vitality you must earn it. By conquering foes and capturing spirit balls, you'll muster the energy to transmute from one beast to another. And each time you do, you'll advance one round closer to the realm of the underworld where Neff awaits the final confrontation.

With five complete rounds to clear, the number of underlings you must defeat is staggering. But Neff promises to be the most loathsome enemy yet, so prepare yourself for the worst. And remember, Zeus didn't bring you back from the grave to fail!

Life Gauge:

During game play, you're given three lives to survive enemy attack. The life gauge is illustrated by either a beast or the Centurion's face with a number indicating how many lives are left. Every time you lose a life, the number will decrease by one. See Option Screen description for additional information.

Power Gauge:

Your energy level is reflected by the Power Gauge. Every time you're hit directly, your energy level will decrease as indicated by the changing color on the Power Gauge.

Your energy level directly affects your lives. Every time the Power Gauge disappears entirely, you will lose a life.

Option Screens:

In order to increase your chances for winning, an Option Screen is provided to let you change standard game settings. Press the Start Button while pressing Button B to view your options.

1-Player vs. 2-Player:

When you play with an opponent in this game, you're actually playing with a partner since you'll fight together. And two Altered Beasts are better than one.

However, winning and losing remains independent. Each player's score is kept separately and whomever loses all their lives will lose the game. The remaining player will battle on to victory.

Other differences are outlined below.

The Art Of Transformation

To benefit from the size and brawn of the Altered Beast — you gotta earn it. And here's how.

The Power Of The Spirit Ball:

In order to transform into the Altered Beast, you must gain and capture the elusive spirit balls. Spirit balls are released from the three-headed wolves when you defeat them. As they float upward, you must contact them with your body or you won't receive their body-altering power. Wolves release only one ball per defeat.

Each time you capture a spirit ball, your strength and fighting techniques will change. According to what round you've reached will dictate the type of beast you become. This is a three-part process.

• **Order of Transformation:**

Contact with one spirit ball makes you a giant man.

Contact with two spirit balls, you're a superman.

Contact with three spirit balls, you're the Altered Beast.

• **Two Players:**

If the game is played by two players, two spirit balls will be released from the wolves and you must capture your own to advance.

Now Make Your Move

Points and rounds will be explained in this section.

The Boss:

Each round has a Boss and he will appear at the end of each round as a horrible and dangerous enemy. Inside a cloud of smoke he'll come forth and attack you mercilessly. You must defeat him in order to advance to the next round.

When you do, the mocking face of Neff will appear and extract all the spirit balls from your body and reduce you to an ordinary Centurion for the next round.

The Demon God, Neff:

Neff will appear during the round several times to challenge you. In the midst of thunder and lightning, he'll deal life threatening blows. However, he can approach you to a certain degree so it's equally smart to try and avoid him since he can't follow.

- Defeat Neff the first time he appears in a round: 100,000 points.
- Defeat Neff the second time he appears in a round: 50,000 points.
- Defeat Neff the third time he appears in a round: 20,000 points.
